

Internal · UI/UX Reference Blueprint

Varistor – Employee Operations & Performance Management System

A single internal platform replacing scattered HR tools, WhatsApp groups, Excel payroll and ad-hoc task lists. This document is the visual specification handed to the UI/UX team — every numbered module from the brief is shown as a wireframe with annotated behaviour.

40 employees · 6 departments16 modules4-phase roadmapMobile + Desktop

5 Digital Marketing	2+ HR / Admin	1 CEO / COO	6 Departments total

SECTION 1

Modules & Wireframes

Every numbered requirement from the brief mapped to a screen. Wireframes use semantic tokens — your designers can swap in Varistor's brand colours, illustrations and typography while keeping the layout intact.

Passing score: 70% · Auto-emails result to HR + Reporting Manager

Submit

06 · Quiz results pipeline: On submission, scores for both quizzes are written to the employee profile and emailed automatically to *HR* and the *Reporting Manager*. A retake is allowed once if score < 70%; second failure escalates to HR. After both modules pass, the employee is redirected to the Dashboard (next screen).

SECTION 2

Recommended Tools & Tech Stack

A pragmatic mix of build-in-house (core modules tied to Vari Points / payroll formulas) and integrate-third-party (where mature SaaS beats reinventing the wheel).

CAPABILITY	RECOMMENDED APPROACH	WHY
Auth & SSO	Built-in email/password + Google SSO	Fits 40-person org; no extra licensing
Training video hosting	Mux / Cloudflare Stream + custom player	Reliable progress events for ‘no-skip’ enforcement
Quiz engine	Custom (questions stored in DB)	Tight coupling to training completion + email triggers
Task / Vari Points	Custom Kanban + ledger table	Points logic is unique to Varistor — must be in-house
Material tracker	Custom (lightweight inventory)	Auto-alerts feed reporting manager
Announcements & reactions	Custom feed	Single source of truth for HR comms
Payroll calc & slips	Custom (xlsx upload → formula engine → PDF)	Indian payroll specifics + 15th-of-month cron email
Email delivery	Lovable Emails / Resend	Reliable salary-slip + result delivery
Leave management	Custom	Tied directly to dashboard balance widget

Document vault	Encrypted object storage + RBAC	Compliance for Aadhar/PAN — HR/Admin only
Notifications	In-app + email + (optional) WhatsApp Business API	Birthday / deadline / approval alerts
Analytics	Embedded charts (performance, leaderboard)	No external BI needed at this scale

SECTION 3

Automation Opportunities

Every recurring manual task in the current workflow has been mapped to a trigger → action pair. These are the cron jobs and event hooks the platform must ship with.

📧 Training completion → HR + Manager email with score Event-driven	📄 Salary slip emailed to all employees on 15th @ 09:00 IST Cron
📅 Birthday banner + balloons on dashboard for the day Daily cron	📅 Birthday reminder pushed to managers 1 day in advance Daily cron
📅 Task deadline overdue → −15 Vari Points + employee notify Scheduled check	✅ Task approved by manager → +VP credited to ledger Event-driven
📦 Material pending past ETA → alert reporting manager Scheduled check	🏆 Quarterly: auto-pick ‘Productive Employee’ from leaderboard Quarterly cron
🏆 Monthly: ‘Employee of the Month’ workflow draft for HR approval Monthly cron	👤 New employee created → credentials emailed + onboarding tasks seeded Event-driven
📎 New chat attachment → indexed for search across the org Event-driven	⚠ Misconduct flag by HR → VP deduction + employee email + audit log Event-driven

SECTION 4

Workflow Improvements vs Today

How the new platform replaces the current scattered toolchain.

PROCESS	TODAY	WITH VARISTOR EOPMS
Onboarding	Manual credential sharing, no training tracking	Admin creates account → auto-routed through gated training + quiz
Team chat	WhatsApp — no archive, lost attachments	Designated groups, searchable, file vault per channel
Task tracking	Verbal / email / WhatsApp	Kanban + Vari Points ledger, manager approval loop
Recognition	Ad-hoc shoutouts	Vari Points → quarterly leaderboard → automated awards
Payroll	Manual Excel, manual mailing	Formula engine + 15th-of-month auto-email of PDF slip
Leaves	Email / spreadsheet	Dashboard balance + HR approval console

Payroll	Manual Excel, manual mailing	Formula engine + 15th-of-month auto-email of PDF slip
Leaves	Email / spreadsheet	Dashboard balance + HR approval console
Compliance docs	Email attachments / Google Drive folder	Encrypted vault, HR/Admin only, full audit trail
Announcements	WhatsApp broadcast	Dashboard feed with reactions and read tracking

SECTION 5

Implementation Roadmap · 4 Phases

Sequenced so HR/Admin can start using the system in ~4 weeks, with full rollout in roughly a quarter.

1

Phase 1 · Foundations

Weeks 1–4

▶ Auth + Admin panel (create employee, assign department, reporting manager)

▶ Employee Dashboard shell (sidebar, header, empty widgets)

▶ Document Vault for HR onboarding (Aadhar, PAN, certificates)

▶ Welcome / Login page + branding pass with UI/UX team

2

Phase 2 · Training & Communication

Weeks 5–8

▶ Training module player with no-skip enforcement

▶ Quiz engine + auto-email of results to HR and Reporting Manager

▶ Department-gated technical modules

▶ Announcements feed with emoji reactions

▶ Centralised group chat (text, images, attachments, search)

3

Phase 3 · Performance & Recognition

Weeks 9–12

▶ Task assignment (manager + CEO/COO) with priority + deadline

▶ Vari Points ledger: +earn, –penalty, manager approval flow

▶ Material tracker with auto-alerts for pending deliveries

▶ Hall of Fame: Employee of the Month, Punctuality, Productive (Quarter)

▶ Birthday detection: 1-day-ahead manager alert + dashboard balloons pop-up

4

Phase 4 · Payroll, Leaves & Polish

Weeks 13–16

▶ Payroll engine: Excel template upload → formulas → per-employee calc from CTC

▶ Salary slip generator with customisable template

▶ Cron job: auto-mail slip to every employee on the 15th

▶ Leave management with HR adjustment console + live dashboard balance

▶ Mobile responsiveness sweep, accessibility audit, security review, training & handover to HR
